

## Upgrade Process to NovaBACKUP DataCenter Standard 5.2

Please follow the steps specified below to upgrade from NovaBACKUP DataCenter Standard 5.x to version 5.2. At the end of this document you will find a collection of download links to support your upgrade.

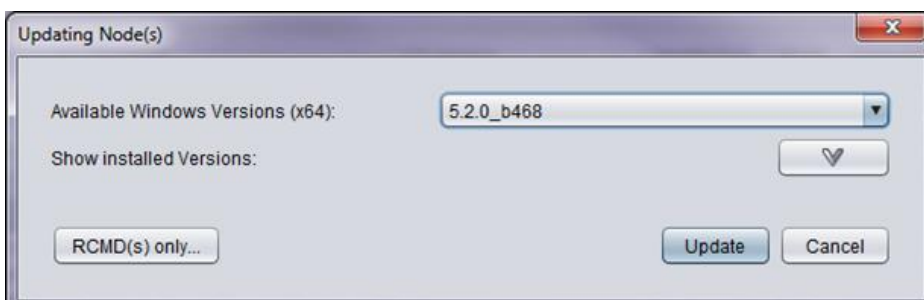

### Upgrade Instruction

1. Download the commandserver installer for the respective OS and the SW-Depot ZIP file. Download links below.
2. Start the commandserver installer and choose the install directory of the existing NovaBACKUP DataCenter 5.x installation, perform the install.

During install, the SW-depot ZIP file will be extracted.

3. After install, open the GUI.
4. Navigate to System->NodesManagement. To update the Client Version, mark all nodes and use function "Update Node(s)". Version must be min. 5.2.0\_b462.

5. To update the DB information, mark all nodes and use function "Sync node info". Click OK on each upcoming check box.
